

Gobeshona Global Conference 4

About Us

- Gobeshona platform established in 2013 in Bangladesh to enhance climate change research effectiveness.
- Monthly webinars, web portal, and conferences unite national and international researchers

Conference Overview:

4th Annual Gobeshona Global Conference focuses on "Monitoring Locally-Led Adaptation and Resilience."

Virtual event spanning 24 hours over 7 days, addressing different continents and geographies.

**Asia and Pacific
Africa and Europe
North, Central, and South America**

Conference Aim:

- Explore impactful 8 principles for locally-led adaptation and resilience.
- Invite organizations and governments adhering to these principles to share experiences.
- Showcase implementation methods, progress monitoring, and lessons learned.

The Event Will Be Held On:

**1st Week of March (TBA)
(Completely Virtual)**

What to Expect

- **Virtual format:** Keynote speakers, organizational sessions, thematic sessions, interactive networking sessions.
- **Diverse Participation:** Scholars, policymakers, and practitioners from various regions.
- **Global Impact:** Emphasis on actionable research contributing to effective climate change solutions.
- **Long-term Vision:** Seeking partners for a decade-long journey towards collaborative networking and shared efforts.
